ABOUT US

ETG Cleaning, our company affiliated with ETG Engineering Services Group Company, provides the cleaning of all types of fuel-sourced chimneys, hoods, ventilation systems and ducts, oily duct cleaning, factory chimneys-ventilation systems and fan cleaning of industrial facilities, as well as maintenance and repair of all systems we provide cleaning services. and manufacturing services to our customers with the most advanced technology and quality, taking into account occupational safety precautions. In addition, by cleaning the dust and dirt layer formed over time on electronic card systems in electrical panels in industrial facilities safely with the help of special apparatus and special chemicals, our expert personnel in order to enable the non-contact problem in electronic circuits and the electronic system to work long-lasting without causing any problems. We provide cleaning services with.

As ETG Temizlik, our biggest goal is to increase our service quality by following new technologies and to provide the best service to our customers.

As ETG Engineering Services, in all our services;

Being aware of the importance of the work we do for our customers, our country and the environment, we are a part of the solution with the philosophy of continuous improvement.

CANVTOMALGÜVTONLİĞİHENCTOLIKLİPRTONSİBİMİZDİR.

OIL DUCT AND HOOD CLEANING

All systems using oily channel processes; In all of the oily air suction ducts in industrial facilities, our expert staff primarily takes care of the safety of life and property, while taking care to clean the risky areas in a way that does not allow fire to occur.

Oily duct systems; consists of hood, chimney and fan part. Cleaning and regular maintenance of the hoods and fans that suck air connected to your oiled ducts, ensuring that the waste gas in the chimney can be easily expelled will reduce the oil accumulation in the chimney, thus extending the life of the fan machine and hood. In addition to oil fires that may occur due to oil deposits that have turned into tar in processes that have not been cleaned in oily channel cleaning, our expert staff cleaning in order to get rid of the heavy oil odor spreading around both visually and hygienically, taking all occupational safety precautions during the work, and the cleaning materials used during cleaning. Even the MSDSs of the solvents are ready and recorded.

The fire in the kitchen ducts starts with the ignition of the oils in the hood mouths, and it is very difficult to interfere with the flaming chimney because the oil is flammable. It is even impossible. While the combustion continues, the temperature rises, splashing on the cables and other materials around it, causing large fires.

Since oily ducts frequently cause fires and material damages; the provisions of the "Regulation on the Protection of Buildings from Fire" dated 12.06.2003 and numbered 2002/4850 and Cleaning is compulsory according to the Fire Brigade Regulation Chimney Directive dated 23.08.1985 and numbered 18851;

CLEANING OF VENTILATION SYSTEMS

Do you know that both your electricity consumption and the risk of failure of your system increase 90% due to dust and dirt in the ventilation ducts?

Pollution in the ventilation systems caused by natural or humans adversely affects human health and production processes. As ETG Engineering, we provide service with our professional technical team and the Special Equipment and Cleaning Robot for the cleaning of the inner surface of the channels, the cleaning of the culverts and anemostats on the channel, the isolation if there is a leak in the channel, and the disinfection of the channels with special solutions. In addition, professional engineers within our company provide services in determining the suitability of grilles, anemostat, filter, fan and duct systems used in ventilation systems, projecting, maintenance-repair, assembly and equipment supply.

CHIMNEY CLEANING

According to the 58th article of the regulation on the protection of buildings from fire, chimney cleaning in all houses and industrial facilities must be made by the fire department or private companies authorized by the fire department at certain periods according to the type of fuel and the frequency of use. In addition, in accordance with Article 17 of the Regulation on the Control of Air Pollution Resulting from Heating, the owner or operator of solid and liquid combustion plants with thermal power (IG) > 15 kW and gas-fired combustion plants with thermal power (IG) > 30 kW, in accordance with the conditions and rules in this Regulation, maintenance, repair, cleaning of the chimney and flue gas measurements by the authorized service or by real and legal persons authorized for maintenance, repair, chimney cleaning and emission measurement.

Authorized by the fire department, ETG Engineering provides services in accordance with the above regulations on chimney cleaning with its professional technical team.

CLEAN YOUR CHIMNEY, SLEEP HEALTHY AND PEACEFUL.

FAN CLEANING

As ETG Engineering, in order for the Oily Ducting and Ventilation systems to work more efficiently, dusting and lubrication occurring in the fan system and preventing the fan from working, special chemicals and equipment with our professional technical team

la clean up system more efficient halo

We are bringing. You can also get the best quality service from our company for all kinds of fan selection, fan supply and fan cleaning.

It is also the most important thing in choosing the right fan and

You are at the right address.

ELECTRONIC CARD AND PANEL CLEANING

As ETG Engineering, we provide cleaning services with our professional technical team by using special chemicals and equipment for dusty and contaminated surfaces formed on electronic cards, circuits and panels. During cleaning, without damaging the structure of the electronic card and circuit, thanks to the non-flammable chemical, a protective layer is formed on the cleaned surfaces. Cleaning your electrical panels and cards at certain periods will reduce your maintenance and repair costs and the malfunctions that may occur in production, and will allow the process to work correctly.

PRIDE OF BEING A LIKED AND RECOMMENDED COMPANY

WE ARE LIVING.
